9/25/96

Dear Steve,

I appreciate your call and your telling Til not to wake me up. I was ~~tired~~ tired, as might be expected from what I was treated for at Johns Hopkins. Which is not quite all those medical problems.

The cancer has been removed from the left ear, pinna to doctors, and the internal bleeding stopped without the cause being learned. Which was not because they did not explore.

That seems to have ended the anemia.

The osteoarthritis is new to me. They did not mention it. And I was not aware of it.

I have a file of additions and inserts for Waketh but did not have time to do the earlier ones. A new one is enclosed.

Can't say we wuz robber but we sure where Mom ed down!

Best,

Randy
